

### Download Okta Mobile

Download and install the Okta mobile app from the Apple App store or Google Play Store.

1. Search for **Okta Mobile** (App Store example)

### Okta Mobile

Okta Inc.

**E** Everyone

INSTALL

### Log Into Okta Mobile for the First Time and Set Your PIN

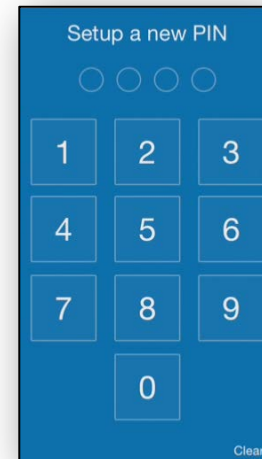

When you first launch Okta Mobile, you'll be asked to enter in your credentials.

1. Enter your **Site name** (company), **Username**, and **Password**

**Note:** Your organization may require you to provide additional security information to sign in.

2. The first time you log in you will be prompted to enter a four-digit PIN (you will need this each time you login to Okta Mobile).

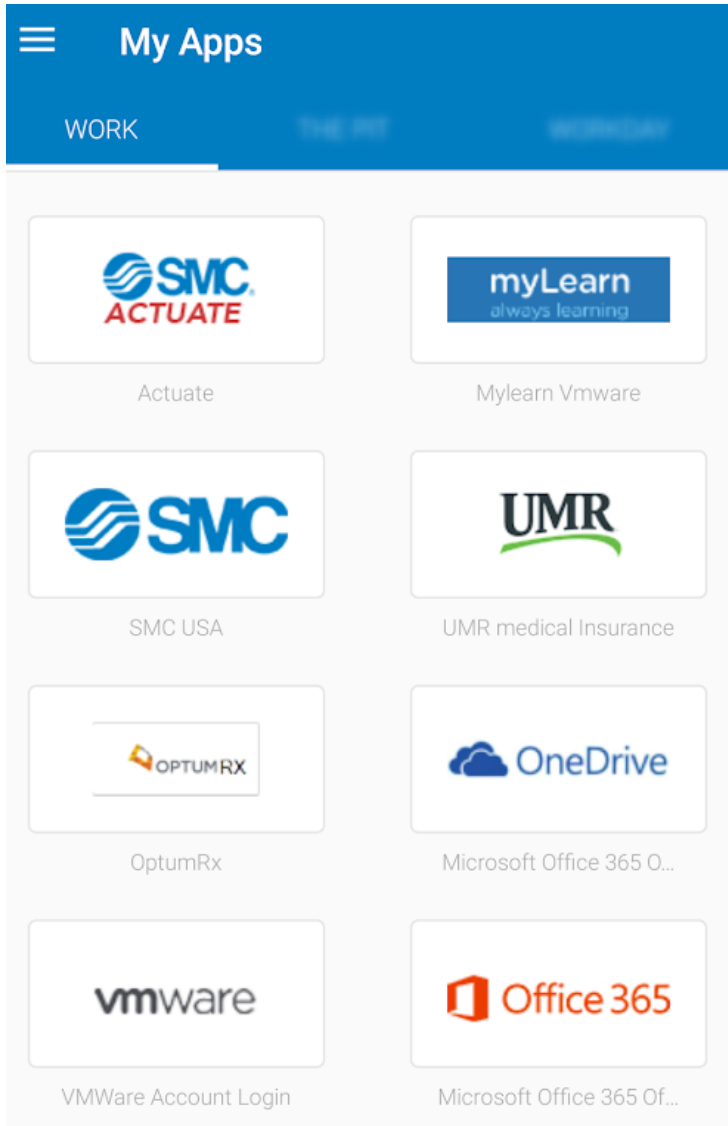

- a) Enter your new PIN
- b) Enter the PIN again to confirm it

**Note:** If you forget your pin on subsequent logins, click the Reset PIN link.

### Access Your Applications

Once logged in, your list of Apps will display.

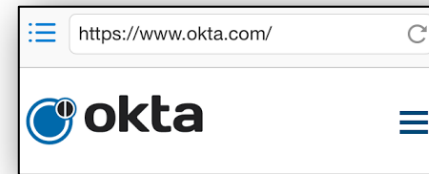

### Use the Okta Browser

You can access the Okta browser by clicking **Browser** (iPhone), **New Tab** (iPad) or your **org name** in the title bar (Android).

The Okta Browser can do the following.

1. **Access the web** – Enter the URL in the address bar.

2. **Simple Google Search** – Enter a search term in the address bar, click **Go**, and you'll see search results from Google.
3. **View the app list** – Return to your list of apps by clicking the list icon.

### Change Your Password for Applications

If you are permitted to edit credentials for an app, you can edit them in Okta Mobile by doing the following:

1. Open the **Apps** menu
2. Click on the **gear icon** for the app credentials you want to edit.

3. Click the **Edit** button, enter new credentials, and click **Done**.

**Note:** Any password changes you make to an app in the Okta Mobile application will be automatically updated in the Okta service, so whether you access Okta via your desktop or mobile device, the app's new password will be used.
